

BI 4.2 UPGRADE PACKAGED SERVICE

Stay Competitive with
Trusted Intelligence
for Everyone.

Solution Integration

Users want access to their BI data 24/7 from any location. Providing reliable, trusted information, that is agile and flexible is paramount to the evolving needs of business users today and the requirements for the future.

Provide BI anywhere with improved mobility features.

Put the users back in control, with self-service BI that requires less training and less IT involvement.

Stay competitive by integrating data into a single source view for users and by providing access and support for big data through Lumira.

Keep your BI system up and running with new features to support NZDT (Near Zero Down Time).

Audit how the system is being adopted to help streamline and innovate.

What's Included

Plan. Review current installation and document the installation plan.

Install. Create a test environment using v4.2.

Secure. Set up security model and advise on new security features.

Migrate. Move content to test environment and complete report conversion.

Test. Complete system testing to ensure migration success. Complete performance review.

Educate. Provide knowledge transfer to System Architect.
